

Your Lean Journey Starts Here

Lean isn't a one-time project — it's a journey. IMC gives you the roadmap and the skills to get there. From introduction to implementation, IMC is your partner in building a sustainable Lean culture. Whether your goal is to introduce Lean thinking, deepen essential skills, or develop certified Lean practitioners, IMC provides the structure and expertise to make it happen.

From introduction to implementation, IMC guides your team every step of the way.

LEARN → APPLY → LEAD

1) Exploring Lean Manufacturing Basics

(half day)

- ✓ Strengthen your competitive edge with **Exploring Lean Manufacturing Basics**—your first step toward a more efficient, agile, and profitable operation.
- ✓ **Exploring Lean Manufacturing Basics** provides manufacturers with a practical introduction to the core principles of Lean. Participants learn how to identify and eliminate waste, improve process flow, and enhance overall productivity.
- ✓ **Ideal for:** frontline employees, production teams, and organizations at the beginning of their Lean journey

2) Introduction to Lean Manufacturing Essentials

(full day)

- ✓ Building off the basics, **Introduction to Lean Manufacturing Essentials** dives into key Lean tools such as 5S, value stream mapping, and visual management. Using hands-on activities, participants learn to identify process waste and begin implementing improvements within their organizations.
- ✓ **Ideal for:** manufacturing supervisors and production leads, engineering, maintenance, and quality professionals

3) Lean Manufacturing Level One Practitioner Certification

(7 days)

- ✓ IMC's **Lean Manufacturing Level One Practitioner Certification** is a hands-on, results-oriented training that dives deeper into the tools, methods, and problem-solving techniques that create real impact on the shop floor. Participants learn how to apply Lean principles to reduce waste, improve flow, and increase productivity while also learning to lead and coach teams through Lean initiatives across manufacturing operations. This course bridges the gap between learning and doing—turning knowledge into measurable performance improvement.
- ✓ **Ideal for:** managers, continuous improvement leaders, engineering, quality, and any manufacturer ready to build and enhance their Lean culture
