2020 Central Susquehanna What's So Cool About Manufacturing? Awards Winners Announced

written by Lauri Moon | May 21, 2020

Student Video Awards Move Online to Celebrate Inaugural Contest During School Closures

IMC is proud to announce the award recipients for the “What’s So Cool About Manufacturing?” (WSCM) Central Susquehanna student video contest awards. The ceremony premiered online Thursday, May 14, 2020 on YouTube.

The video with the most votes, during three days of online voting in April, received the “Viewers Choice Award.” A panel of judges reviewed the videos for awards in three other categories: Outstanding Overall Program, Outstanding Team Spirit and Outstanding Brand Placement.

The WSCM contest partners students, from schools in Columbia, Lycoming, Northumberland, Snyder, and Union counties, with local manufacturers. Each student team scripted, shot, edited and promoted a short video that documents their experience, highlighting what is “cool” about manufacturing. One video in the region

will be moving on to represent Central Susquehanna at the third-annual statewide competition in June.

“We had a really great contest our first year, and we’re so excited to share the videos and winners during our awards ceremony online,” said Dan Manetta, Executive Director/CEO IMC. “The students, the teachers and the manufacturers put in so much hard work to build this inaugural contest, and with everything that is happening right now, it’s important to be able to celebrate their accomplishments.”

This year’s awards and their winners are as follows:

1. Outstanding Overall Program: Millville Area Middle School - SEKISUI KYDEX
2. Outstanding Team Spirit: Central Columbia Middle School - Autoneum North America, Inc.
3. Outstanding Brand Placement: Lewisburg Area Middle School - GAF
4. Viewers Choice Award: Mount Carmel Middle School - Brush Industries, Inc./Qcard

Congratulations to the Millville Area Middle School and SEKISUI KYDEX team who are moving on to the statewide competition in June.

Williamsport/Lycoming County

Chamber Announces Small Business Relief Fund Grant

written by Lauri Moon | May 21, 2020

The Williamsport/Lycoming Chamber of Commerce has established a pool of \$200,000 that will be used to make grants and loans to small businesses that have been severely impacted by the Covid-19 pandemic. It is the intent of these funds to assist small business in restarting or getting back to full operations upon federal and state guidance.

Small businesses with annual revenue not exceeding \$3,000,000 are eligible to apply. The funds will be made available in a combination of grants and loans, with grants not exceeding \$2,000 and total assistance to a business not exceeding \$4,000. The loans will be for 2 years from signing and will be at 0% interest. Loan payments will begin 6 months from the loan origination date. Businesses must be located in Lycoming County.

Applications will be reviewed as they are received and applicants will be accepted or denied on a rolling basis. Funds can be used for operational expenses including supplies/inventory, rent, utility bills, etc. as well as advertising, marketing, consulting, and training. Applications must include a list of proposed expenses grants will be spent on. Applications without a list of proposed expenses will be considered incomplete. Note, businesses applying do not need to be a Chamber of Commerce member and will not be expected to join should funding assistance be provided.

The application can be found by going to www.williamsport.org under the COVID-19 Useful Links tab. Call 570-326-1971 with any questions on the program.

Study finds more than 13:1 Return on Manufacturing Extension Partnership Program

written by Lauri Moon | May 21, 2020

A new study by Summit Consulting and the W.E. Upjohn Institute finds that the National Institute of Standards and Technology's Hollings Manufacturing Extension Partnership (NIST MEP) Program generates a substantial economic and financial return of nearly 13.4:1 for the \$140 million annually invested by the federal government. The NIST MEP program, of which IMC is your Central PA MEP, is a public-private partnership created in 1988 to improve the global competitiveness and productivity of America's small- and medium-sized manufacturers.

Using the national REMI® model, along with the results from the FY2019 NIST MEP client impact survey conducted by Fors Marsh, LLC., the team finds that economic returns are robust. The study uses a conservative approach in estimating the broader economic impacts of the program by examining the competitive interactions between firms. NIST MEP contracted with Summit and Upjohn to create a study to estimate the broader national impacts of the NIST MEP program. The study and the subsequent report, *The National-Level Economic Impact of the Manufacturing Extension Partnership (MEP): Estimates for Fiscal Year 2019*, is now available.

"Year after year, the Upjohn Institute reinforces the worth of the MEP National Network to the small and medium-sized manufacturing community," said Dan Manetta, IMC Executive Director/CEO. "The results of this report show good ROI for individual manufacturers, along with significant contribution to the U.S. Treasury."

A Positive Return on Investment

The study reports that the \$140 million invested in MEP during FY2019 generated nearly a 13.4:1 increase in federal personal income tax (\$1.87B/\$140M federal investment). The study only looks at personal income tax and not business taxes. In addition, the analysis provides a conservative estimate of broader impacts as they are based only on completed surveys and do not include estimates of additional

impacts of center-activities for non-respondents.

The MEP Program Generates Additional Jobs for the U.S.

The study finds that total employment in the U.S. is nearly 217,000 higher because of MEP center projects. This estimate includes both direct, indirect, and induced jobs generated by MEP projects. These jobs support additional manufacturing jobs critical to U.S. supply chains and jobs outside of manufacturing.

Other Positive Impacts of the MEP Program

The study examines additional areas of economic impact generated by the MEP Program. It finds: (1) personal income is \$14.0 billion higher, and (2) GDP is \$22.9 billion larger. This translates into an increase of \$1.87 billion in personal income tax revenue to the federal government.

About Innovative Manufacturer's Center

Founded in 1988, the Innovative Manufacturers' Center assists in connecting manufacturers in 12 Pennsylvania counties with the most effective regional, state and national resources to help companies innovate, grow and prosper. An affiliate of the U.S. Department of Commerce, National Institute of Standards and Technology's Hollings Manufacturing Extension Partnership and supported by the Pennsylvania Department of Community and Economic Development, IMC is one of seven industrial resource centers in Pennsylvania and serves manufacturers in Lycoming, Montour, Northumberland, Union, Snyder, Clinton, Centre, Mifflin, Juniata, Huntington, Blair and Bedford Counties.

About the MEP Program.

MEP has centers in all 50 states and Puerto Rico that are dedicated to serving small- and medium-sized manufacturers with over 1,400 trusted advisers who work with local manufacturers to provide services that improve their competitiveness and productivity and help create and retain jobs, increase sales and improve local economies.

About Summit Consulting.

Summit Consulting is a quantitative and management consulting firm that works with public and commercial clients to turn data into actionable intelligence.

Summit's partners, directors and subject matter experts lead teams in five core areas: federal credit and risk analytics, health and employment, litigation analytics, mortgage finance, and program management and business modernization. Summit couples core expertise with methodology to derive sound, transparent and reproducible results.

About the W.E. Upjohn Institute for Employment Research.

The W.E. Upjohn Institute for Employment Research was created in 1945 from the W.E. Upjohn Unemployment Trustee Corporation, established in 1932 to address issues of unemployment during the Great Depression. The Upjohn Institute is a private, nonprofit, nonpartisan, independent research organization devoted to investigating the causes and effects of unemployment, identifying feasible methods of insuring against unemployment and devising ways of alleviating the distress and hardship caused by unemployment. Upjohn's broad objectives are to: (1) link scholarship and experimentation with issues of public and private employment and unemployment policy; (2) bring new knowledge to the attention of policy makers and decision makers; and (3) make knowledge and scholarship relevant and useful in their applications to the solutions of employment and unemployment problems.

More information, including the full report, is available at the Upjohn Institute website.

Manufacturer Return to Operations & Best Practice Guide Now

Available

written by Lauri Moon | May 21, 2020

IMC's *Manufacturer Return to Operations & Best Practice Guide* is now available! Gain insights for restarting your operations safely and efficiently and discover best practices in minimizing COVID-19 risks among your workforce. Thanks to our sister center NEPIRC for putting this guide together and for offering it to IMC and our manufacturers!

IMC Executive Director Named to COVID-19 Advisory Board

written by Lauri Moon | May 21, 2020

Williamsport City Mayor Derek Slaughter has created an advisory board to help to mitigate hardships caused by the COVID-19 pandemic. The Mayor's Advisory Board on COVID-19 consists of key stakeholders the mayor selected from among the health care, business, government and public and private sectors.

“In response to the needs of the greater community, I created the Mayor’s COVID-19 Advisory Board. This board of key stakeholders will identify the impact, needs and a path forward for Williamsport. The board will determine how the City can best respond and assist as we navigate COVID both in the short-term and long-term. Their advice will help guide us, help the City make the necessary changes it may need to make and help this administration find the extra resources to do the work.” stated Mayor Derek Slaughter.

The board includes Mayor Slaughter; Steven P. Johnson, CEO and president of UPMC Susquehanna; Dr. Davie Jane Gilmour, president of Pennsylvania College of Technology; Kent C. Trachte, president of Lycoming College; Jason Fink, president/CEO of the Williamsport/Lycoming Chamber of Commerce; Jennifer Wilson, president/CEO of First Community Foundation Partnership of Pennsylvania; Shannon Rossman, executive director of Lycoming County Planning; Dan Manetta, executive director of the Innovative Manufacturers’ Center (IMC); Beth Armanda, president of the Williamsport Business Association, Small Businesses/Restaurants; Damon Hagan, chief of the Williamsport Bureau of Police; Stephanie Young, director City Community Development; Joseph Pawlak, city budget and fiscal officer; Nicholas Grimes, city treasurer; Tim Bowers, superintendent, Williamsport Area School District; Ron Frick, president of Lycoming United Way and Williamsport City Councilman Adam Yoder.

Local Manufacturer Shares COVID Health and Safety Compliance Procedures

written by Lauri Moon | May 21, 2020

Investing in your future

Data Papers, Inc. in Muncy, PA developed an assortment of policies / procedures relative to employee health and safety and regulatory compliance for their facility as they get back to semi-normal operations and offered IMC to share these with the manufacturing community.

Thanks to Jerry Wertz and the team at Data Papers, Inc.!

WEDnetPA COVID-19 Update Related to Training Grants and Eligibility

written by Lauri Moon | May 21, 2020

WEDnetPA and the PA Department of Community and Economic Development (DCED) want to help your company navigate the weeks and months ahead and want to ease concerns regarding the impact of COVID-19 on this year's training grants and next year's program eligibility. To ensure we provide maximum support to all companies currently participating in WEDnetPA, we want to make you aware of the following policies that have been implemented:

- Any trainings that cannot be completed by June 30th can be completed and submitted next year. After June 1st, your company will need to apply for a new FY20-21 grant to submit the training for reimbursement.
- All companies with training grants this year will be able to apply again next year, even if your company is technically ineligible based on funding history.
- If you plan to apply again next year and the WEDnetPA online system indicates you are ineligible, contact your local WEDnetPA Coordinator for assistance.

For additional information on WEDnetPA funding, opportunities, or training, visit <http://wednetpa.com/>.

State Launches Manufacturing Call to Action Portal

written by Lauri Moon | May 21, 2020

With the on-going need for PPE and other critical medical supplies, the Wolf administration has launched a Manufacturing Call to Action portal, with the intent to:

- **Match** Pennsylvania manufacturers and distributors to fill specific supply chain needs to meet increasing demands for medical supplies and related products.
- **Assist** Pennsylvania manufacturers who have workforce needs or gaps and assist them with identifying skilled workers.
- **Identify** Pennsylvania manufacturers who can pivot or innovate to fulfill the demand for medical supplies and related products.

The administration welcomes manufacturers as described above with a Pennsylvania presence to inform the state of capabilities, needs, gaps or potential innovative solutions. To submit information, visit

<https://spportal.dot.pa.gov/ppeinventory/pages/mschain.aspx>.

DCED Announces Waiver Application Process for Businesses Will End Friday

written by Lauri Moon | May 21, 2020

Last night, the Wolf administration announced that the waiver application period for businesses seeking to continue operating in the wake of the governor's order for "non-life-sustaining" businesses to close their physical locations will end on Friday, April 3. To determine if the shutdown order applies to your industry, for the most current list of exempt industries, for a FAQ document developed by the Wolf administration and businesses still interested in seeking a waiver, [click here](#).
