

10 Key Moves to Integrate EHS, OpEx and Supply Chain Systems for Success

written by Lauri Moon | March 3, 2022

Learn how a 150-year-old global manufacturer systematically integrated its EHS, OpEx and supply chain systems to optimize employee engagement, sustainability and business results.

Milliken & Co. makes specialty chemicals, floor coverings and textiles at plants in the U.S., Mexico, Australia, China and throughout Europe, a global footprint that can be challenging to manage. In this powerful webinar, you will hear their 10 key reflections on building and sustaining excellence across their global business, despite the severe competition, high labor turnover, remote working and disrupted supply chains.

Learn how to:

- Prepare for the change
- Spot early signs that can block progress and develop strategies to avoid/remove them
- Maintain momentum and energy
- Develop a sustainable engaging approach to deliver year on year performance.

Join us to hear proven best practices from the multi-award winning Manufacturing Organization that is now helping other companies build and sustain their own approaches to excellence & world class health & safety, operations and supply chain with their globally recognized consultancy.
