

Act 129 Funding and Other Incentives for Energy Efficient Projects

written by Lauri Moon | April 27, 2021

Often, companies are eligible to apply for funding assistance to offset the cost of energy efficiency improvement efforts but are uncertain where to find these incentives. During this webinar, we will discuss opportunities and incentives for small to mid-sized companies in the Northcentral Pennsylvania Roundtable region.

We will have representatives discussing prospects for funding through:

- FirstEnergy Act 129
- Department of Environmental Protection (DEP) Small Business Advantage Grant
- West Penn Power and Penelec Sustainable Energy Funds (SEFs)

If you have specific questions about grants and incentives, we will have representatives available during this webinar to address your funding questions.
