

Acumatic Manufacturing Demo

written by Lauri Moon | June 25, 2019

Learn how Acumatica's Manufacturing ERP software integrates manufacturing, inventory management, and accounting to help businesses ensure raw materials are available to production, manage the  manufacturing process, maintain revisions, and track the financials.

In this session we'll cover areas that provide real outcomes for manufacturers:

- Bill of Materials (BOM) & Routings
- How to plan and manage inventories, costs, and manufacturing processes, as well as full revision control
- Production Management
- How to schedule production on the shop floor and track material and labor costs
- How to compare standard and planned production costs to the actual costs of the production order

Let this overview of Acumatica's Manufacturing Edition provide you with some answers during your ERP selection process.
