

Are You Ready for the Next Stage of the Industry 4.0 Revolution?

written by Lauri Moon | September 2, 2020

Driving Excellence Across Process Industries

Manufacturing companies are challenged to increase productivity while producing individualized products with high quality in an environment of constantly changing and varying customer demand. Many companies recognize Industry 4.0 as strategic priority to turn these challenges into opportunities.

Where does your organization stand when it comes to changes brought on by Industry 4.0? Are you ready to redefine your manufacturing processes and the value your products provide for the next stage of industrial revolution?

Join SAP for this 1 hour webcast on how the latest IIOT/Industry 4.0 approaches can help your organization drive operational excellence.

Learning objectives:

- Learn how your organization can achieve fully automated manufacturing operations for process industries such as chemicals, oil and gas, life sciences, and more.
- Watch a live demo where Industry 4.0 and IIOT experts from SAP outline best practices for achieving end-to-end integrated business processes plus the integration of operation and IT systems to enable operational excellence with low human touch.
- Get a bird's eye view of SAP's Industry 4.Now initiative and how you can deploy the strategy quickly for rapid ROI.
