

Avoiding Profit Killers in Manufacturing Maintenance & Operations

written by Lauri Moon | July 13, 2020

Your manufacturing operations over the last 12 months have endured an incredible degree of macroeconomic turmoil: a slowing U.S. economy, on-again/off-again U.S.-China trade relations, and of course the COVID-19 pandemic that has disrupted your workers, your supply chain and your customer demand.

With so much uncertainty you can't control, it is vital that you have your manufacturing operations in order. Your operations need to be lean and efficient to reduce your exposure, and **your maintenance operations are the key to your profitability.**

In this free webinar, you will learn how optimized maintenance operations can help you avoid the "profit killers" of downtime, stock-outs and compliance gaps — issues no one can afford in these challenging times.

Join us as we cover:

- The top profit killers you should be worried about
- How superior maintenance operations are the key to avoiding them
- How the COVID-19 pandemic has shaped the future of maintenance operations
- Industry best practices, technology and services that will help you on the path to greater profitability
