Building a Culture of Cybersecurity Awareness for Employees in Manufacturing

written by Lauri Moon | October 19, 2018

Even the best information technology infrastructure won't stop a well-meaning employee from clicking a malicious link or providing their password over the phone to someone impersonating your IT department. Cyber criminals know that manufacturing companies invest in this infrastructure, so employees are both the weakest link and best entry point to access the companies crown jewels. Building a culture of awareness within the organization teaches employees to identify and mitigate cyber risks. In this webinar you'll learn how to develop a culture of cybersecurity awareness in your organization, train employees to identify cyber risks, and reduce this risk of security breaches.
