

CMMC Assessments - What to Expect

written by Lauri Moon | January 9, 2023

To become CMMC Level 2 certified, you'll need to pass a CMMC assessment by a 3rd-party assessment company called a C3PAO. CMMC assessments are highly detailed and require demonstrable evidence that you meet each of the NIST SP 800-171 controls. In order to be certified, all 320 control objectives must be met.

In this session we'll be pulling back the curtain on a CMMC assessment. We'll be uncovering important details such as:

- How is a CMMC assessment conducted and who will need to participate?
- What objective evidence will the assessor look for?
- How long will a CMMC assessment take and what will it cost?
- How should you choose your C3PAO to conduct the assessment?
- Who will make up the CMMC assessment team?

Join IMC and our third-party partner Core Business Solutions as we peek into the details of a CMMC assessment to help you be well prepared.
