CMMC Level 1 Preparedness Training

written by Lauri Moon | July 16, 2021

This webinar will cover Cybersecurity Maturity Model Certification (CMMC) Level 1 basics, including real-life business challenges.

During the webinar, Project Spectrum will:

- Explain the purpose of the CMMC.
- Examine the Level 1 domains and provide solutions to common challenges.
- Provide cyber hygiene best practices for preventing several types of cyberattacks.
- Define key CMMC terms and review the steps required for Level 1 certification.

Register

Project Spectrum is a U.S. Department of Defense (DOD)-sponsored initiative that provides companies, institutions, and organizations with a comprehensive, cost-effective platform of cybersecurity information, resources, tools, and training. Our mission is to improve cybersecurity readiness, resiliency, and compliance of small/medium-sized businesses and the Defense Industrial Base (DIB) manufacturing supply chain.
