

Implementing Collaborative Robots in Industry

written by Lauri Moon | August 24, 2017

Join us October 30th and meet the world's #1 collaborative robot. Around the world, thousands of UR robots work collaboratively right alongside humans - with no safety guards and no problems.

Agenda:

- Intro to Universal Robots
- Robot Programming Intro
- End Effector Solutions
- Stands and Protective Covering
- Questions / Applications
- **Hand-on Activities**

Benefits of Collaborative Robots:

- Fastest Payback in the Industry
- Collaborative and Safe
- Flexible Deployment
- Easy Programming
- Fast Set-up

There will be a light breakfast provided, compliments of Intek Systems, Inc.
