

Combined Heat & Power for Commercial Buildings

written by Lauri Moon | October 23, 2020

The Southwestern Pennsylvania (SWPA) Energy Efficiency Roundtable's mission is to help businesses and industry in SWPA reduce energy costs through improved energy management, energy efficiency optimization, and implementation of cutting-edge technology. The Roundtable provides a forum for large industrial and commercial energy users to share information and learn from experts on various energy topics, from energy efficiency technologies to energy management strategies.

During this webinar, energy managers will be presented with cutting-edge information on combined heat and power (CHP) for commercial buildings and industrial operations. This webinar will showcase the major contribution that CHP systems can make to advance your organization's mission, commitment to sustainability, and minimizing environmental impact.
