

Cyber Circuits | Direct Access to Small Business

written by Lauri Moon | July 16, 2021

Cybersecurity is more important than ever. IMC, in connection with NIST MEP, is partnering with Project Spectrum to assist manufacturers with free education and cyber readiness checks for NIST SP 800-171, CMMC Levels 1, 2, and 3.

Join us as we attend these upcoming webinars and connect anytime with our in-house cybersecurity advisor, Nathan Allen for a free evaluation and recommendations for your cybersecurity path going forward.

Project Spectrum and U.S. Department of Defense, Director of Small Business Programs, Farooq A. Mitha will discuss:

- the latest cybersecurity attacks and vulnerabilities to small businesses
- updates on small business programs
- support the U.S. Department of Defense is providing for small businesses

Project Spectrum is a U.S. Department of Defense (DOD)-sponsored initiative that provides companies, institutions, and organizations with a comprehensive, cost-effective platform of cybersecurity information, resources, tools, and training. Our mission is to improve cybersecurity readiness, resiliency, and compliance of small/medium-sized businesses and the Defense Industrial Base (DIB) manufacturing supply chain.
