

Cybersecurity Maturity Model Certification (CMMC)

written by Lauri Moon | July 13, 2020

Manufacturers in the DoD supply chain are required to have adequate information security measures in place to protect Controlled Unclassified Information (CUI). Starting in 2020, independent auditors will be assessing manufacturers' security posture, which will determine which contracts they can bid. This session will provide an overview of these requirements and the various options available to ensure compliance with them.
