

Determining the Correct Cyber Compliance Level for My Company

written by Lauri Moon | February 10, 2022

The difference between FAR 52.204-21/CMMC 2.0 Level 1 and NIST 800-171/CMMC 2.0 Level 2 has a significant impact on your business from a time to acquire, cost, and network protection perspective. What level does your company need? This FREE session will help you make an informed decision.

- What is Federal Contract Information (FCI) vs. Controlled Unclassified Information (CUI)?
- Which contracting standard applies to FCI and CUI?
- What type of information can be posted or processed on publicly accessible information systems?
- What are the acceptable methods to destroy FCI or CUI when this information is no longer needed?
