

Developing Your Workforce with Online Training & Certification

written by Lauri Moon | February 22, 2023

Learn the different ways manufacturers across Pennsylvania are leveraging online learning to develop their incumbent workforce, from entry level staff who need foundational skills to seasoned staff who may need to brush up on new technologies.

Tooling U-SME offers a wide array of online learning assets that are easy to customize and administer through its learning management system.

The following SME Certifications will be highlighted:

- Certified Manufacturing Associate
- Robotics in Manufacturing Fundamentals

Presenter:

Greg Surtman, Workforce Development Manager, ToolingU-SME

Greg is responsible for leading the team that supports Tooling U-SME's 900+ partner network, including the IMC. This partner network collaborates to provide learning solutions that addresses the skills gap in manufacturing by filling the talent pipeline and continuing to develop the incumbent workforce.

Greg has over 26 years of workforce development experience as a top performer at New Horizons CLC, Cuyahoga Community College, Contract Training Edge LLC, & Tooling U-SME. He holds a Bachelor of Business Administration from the University of Toledo, is a Lean Six Sigma Green Belt, and a Certified DiSC Facilitator and serves on the Board of Directors at the Uniquely Abled Project/Academy. Greg is passionate about helping both individuals and manufacturers succeed by bringing stakeholders together to create local talent ecosystems.
