

# Doing Your Best with Less: Efficiency Tools for Manufacturing Maintenance Leaders

written by Lauri Moon | October 20, 2020

The bar for maintenance operations leaders has never been higher. You're being expected to complete your daily work and plan for a better future with fewer resources than ever. So, how are you finding creative ways to work smarter and more efficiently - to truly do your best with less?

We understand your passion, drive and need to succeed in today's environment. That's why we are sharing continuous improvement tips that can make a difference in your efficiency, staff productivity, levels of service, compliance, and environment of health and safety - all powered by a CMMS (computerized maintenance management system).

Join our webinar for insight into the connected tools you need to truly kickstart your efficiency improvement plan, including:

- Keys to organizing maintenance processes and increasing maintenance productivity by 28%
- Ways to streamline your inventory needs and save 19% in critical spares/inventory costs
- How you can save 20% on utility costs with streamlined energy management
- A strategic solution that can help stretch the life of your assets and optimize capital production asset planning
- How maintenance operations leaders like you are finding improved efficiencies in today's environment
