

# Food Packaging & Design Development

written by Lauri Moon | January 6, 2020

This free webinar covers some of the basics that you will need for getting your food product packaging started and examples of scale up projects.

***If you're asking yourself these questions, this webinar is for you:***

- I have a food product or an idea for a food product, what kind of packaging development and design is required?
- Where do I start?
- What is required on the primary packaging?
- Is food packaging different from other packaging?
- What kinds of packaging materials should I consider?

***This webinar has been brought to you by the tri-state food manufacturing collaborative which consists of Impact Washington, Idaho TechHelp and Montana Manufacturing Extension Center, members of the Manufacturing Extension Partnership National Network, or MEP National Network™. IMC is your Central Pennsylvania Manufacturing Extension Partnership Center.***
