

Hazardous Energy Control (Lockout/Tagout) Training

written by Lauri Moon | February 25, 2021

This half-day course will highlight lockout/tagout hazards found in manufacturing facilities, and how to effectively prevent lockout/tagout accidents by implementing an effective energy control program.

COURSE TOPICS:

- OSHA's Lockout/Tagout Standard
- Energy Control Programs
- Case Studies
- Energy Control Procedures

HOW YOU WILL BENEFIT:

- Gain insight on OSHA's lockout/tagout standard
- Know the elements of an energy control procedure
- Participate in case studies that will assist you in understanding how to meet the OSHA requirements

This course will be offered virtually through Webex. A link to the course will be sent to all course registrants prior to the course.

Note: This course is for private-sector employers and employees. This training is funded under grant number Grant SH-99019-SH0 (from the Occupational Safety and Health Administration, U.S. Department of Labor) and being hosted by Georgia Tech.
