

How to Drive Effective Digital Transformation, and Adopt AI and Machine Vision in Your Factory

written by Lauri Moon | December 8, 2021

Manufacturers are constantly looking for new ways to optimize their operations, reduce cost, and improve productivity. Today, **most factories leverage only a fraction of daily production data** because of latency, security, and privacy limitations. Taking advantage of AI and intelligent edge platforms will enable you to connect your assets, analyze data at the edge, get insights on the assets' condition and manufacturing processes, and act upon it in real-time to maximize throughput and minimize downtime. But how can you get started?

Intel has been working with multiple manufacturers, directly and through its ecosystem partners, to develop intelligent edge platforms enabled by AI. During this webinar, Capgemini, Mariner, Altair will review their solutions that address various manufacturing challenges. Join us to see **how these companies already realize gains**.

- Capgemini - Predictive asset maintenance solution to increase factories' efficiency, production capabilities
- Altair - AI-powered design to achieve manufacturing efficiency
- Mariner - Visual quality inspection to improve production cycle time, increase efficiency, and enhance quality standards

Speakers:

Fatma Kocer, Vice President for Engineering Data Science, Altair

Peter Darragh, Executive Vice President of Product Development, Mariner

Charles Cote, Director, Chief Architect & IoT Solutions Leader, Capgemini

Stephanie Grisafi, Global Sales Director, Manufacturing / IOT Global Sales, Intel

Jack Dunnigan, Sr. Director Industrial and Auto BU, PSG, Intel

Steven J. Meyer, Sr. Principal Engineering - Facilities Automation, Intel Corporation

Ram Ramasamy, Vice President and Global Client Leader, Frost & Sullivan
