

# How to Make Your Organization Resilient to Complex and “Wicked” Problems

written by Lauri Moon | October 29, 2024

## **Become a Sustainability Change Champion!**

This webinar is the second in a series of unique webinars that will give you tremendous insight into how to become a sustainability change agent within your organization and drive sustainability initiatives that deliver business results.

This webinar provides emerging leaders with practical tools and strategies to address the most challenging and complex problems their organizations face. Participants will learn how to approach these “wicked problems” by embracing flexibility, engaging with various stakeholders, and developing strategies that adapt to changing circumstances.

## **Learning Objectives**

- Understand the nature of complex challenges and how they impact organizations
- Learn to use strategic thinking to analyze and address these challenges effectively
