How to Modernize Your Contractor Management Program in Less than 21 Days

written by Lauri Moon | June 2, 2021

Contractors, vendors and suppliers play a crucial role in the modern business landscape, but most companies are still using yesteryear's processes to manage their third-party compliance qualifications.

In this webinar Mark Bania, the CEO of Contractor Compliance, will explain why an outdated system is problematic while also showing you how to modernize it into a lean, mean compliance machine in less than 21 days.

Register now to learn about:

- The current state of contractor management and why we need to adapt
- How spreadsheet errors can cost your business millions
- Why outdated manual processes create risk and waste time
- Internal vs External third-party management: Why liability is a major factor
- How 2020 solidified the digital future of safety
- Technological advancements in contractor management
- How to modernize your program in less than 21 days
