

Improving Quality Using Six Sigma Concept

written by Lauri Moon | August 3, 2016

Having worked with many businesses over the years, Diane Buckley has seen many issues such as companies having unsatisfied customers, problems managing resources and the need for quality improvement processes.

In this webinar, we are going to take some basic concepts of lean and six sigma methodologies and discuss how you can use them to help your company improve.

These methodologies are not rocket science, but they do require some discipline, and in many cases, require businesses to think and act differently.

Key Points:

- Learn about lean and six sigma principles
- Implement simple tools for your business
- Discuss strategies for creating quality culture in your business
- Earn 1 PDU

Presenter: Diane Buckley-Altwies, MBA, PMP, CEO of Core Performance Concepts, Inc.

Once registration is received, you will be emailed webinar login information.
