

Lean Users Group - TPS Plant Tour

written by admin | January 6, 2016

Thermal Product Solutions will share their Lean / Continuous Improvement journey and provide a plant tour.

Primary focus will be on these three areas:

1. Visual Metrics on the Plant Floor
 - Identifying *meaningful metrics* and getting them in front of people continues to be one of the most significant challenges for companies - can't learn too much about this!
2. Thermal Product Solution's application of 4D Execution (Stephen Covey methodology for ensuring focus and execution on critical challenges)
 - We're always talking about *purposeful not reactive*. This is a "how-to" in operational purposefulness.
3. Project Management
 - Learning what the TPS group is doing.

As always, attendees will be able to share what's working and not working in your world.

Seating is limited, Register today!
