

# Lockout/Tagout Training

written by Lauri Moon | August 26, 2021

This full-day course will highlight lockout/tagout hazards found in manufacturing facilities and how to effectively prevent lockout/tagout accidents by implementing an effective energy control program.

## **COURSE TOPICS:**

- OSHA's Lockout/Tagout Standard
- Energy Control Programs
- Case Studies
- Energy Control Procedures
- Lockout/Tagout for Robotics

## **HOW YOU WILL BENEFIT:**

- Gain insight on OSHA's lockout/tagout standard
- Know the elements of an energy control procedure
- Participate in case studies that will assist you in understanding how to meet the OSHA requirements
- Learn the basic requirements of how the lockout/tagout standard applies to robots

**This course will be offered virtually through Webex. A link to the course will be sent to all course registrants prior to the course.**

**Note:** This course is for private-sector employers and employees.

This training is funded under grant number Grant SH-99019-SH0 (from the Occupational Safety and Health Administration, U.S. Department of Labor).
