

Lockout/Tagout Training

written by Lauri Moon | August 26, 2021

This 1.5-hour training will highlight lockout/tagout hazards found in manufacturing facilities, and how to effectively prevent lockout/tagout accidents by implementing an effective energy control program.

COURSE TOPICS:

- OSHA's Lockout/Tagout Standard
- Energy Control Programs
- Energy Control Procedures

HOW YOU WILL BENEFIT:

- Gain insight on OSHA's lockout/tagout standard
- Know the elements of an energy control procedure
- Understand methods of hazardous energy control

This training will be offered virtually through Webex. A link to the training will be sent to all training registrants prior to the training.

Note: This training is for private-sector employers and employees.

This training is funded under grant number Grant SH-99019-SH0 (from the Occupational Safety and Health Administration, U.S. Department of Labor).
