

# Machine Learning in Manufacturing

written by Lauri Moon | November 9, 2021

**Are you underutilizing your data that could lead to productivity opportunities?**

**Does your company have a specific problem but lacks resources to solve it?**

**Machine Learning can be a cost-effective way to turn your data into solutions**

How can Machine Learning benefit your manufacturing operation? Join us to learn how Machine Learning or Artificial Intelligence fit into your organization and the benefits that come with it.

## **Agenda:**

- What is Artificial Intelligence (AI) and what's possible?
- What is Machine Learning (ML) in comparison to AI?
- Where is ML currently applied in manufacturing - could use higher level examples instead of just manufacturing
- Where to begin with ML
- Manufacturer's future with ML
  - Long-term Value Proposition
- Summary of benefits
  - Resource list

**Presenter** Chelsea Cummings, The Barnes Global Advisors

**Who Should Attend** This webinar will be tailored for manufacturing companies that want to learn more about Machine Learning and implement these People who are overwhelmed by their data.
