

Making Safety and Health Relevant to the C-Suite

written by Lauri Moon | September 26, 2022

Over the last decade, a number of organizations have been rocked by unforeseen supply chain disruptions and vulnerabilities. A break in the chain can occur from anywhere: it could be a human right violation in the sourcing location, poor workplace safety policies and unethical procurement practices, or incidents involving injuries or damage to property. The unfortunate reality is that as supply chains grow more globalized and complex, they become more prone to volatility.

With over three decades of experience working with more than 125,000 suppliers, Avetta has developed standard operating procedures to help companies make their supply chains safer and more reliable. We're sharing these exclusive insights in this session.

Safety and Supply chain leaders will learn:

- Critical success factors for their business
- Insights into common areas of improvement backed by global data
- Simple steps organizations can be taking today to improve their supplier management process
