

Managing Exposure Risks with Innovative Technology: Answering Questions You Were Too Afraid To Ask

written by Lauri Moon | May 23, 2019

Organizations like yours employ EHS professionals to help keep front-line employees safe from harmful workplace exposure. But to do this successfully, you need to accurately identify hazards that put your employees at risk. With technology, instead of having a few EHS professionals identifying hazards and managing risk for thousands of employees, companies can turn to their employees for help. As your first line of defense and best access to hazards and potential risk visibility, your employees should be empowered to help your EHS professionals source exposure hazards across your company. With recent advancements, you can now make that process much easier than ever before.

During this webinar, you will learn how to:

- Implement different methods for your front-line employees to report exposure risks
- Empower employees with innovative technology like wearables, IoT, big data, and more
- Elevate exposure risk management as a key pillar in holistic employee well-being
