

Modernizing Your Operations - Selecting a New ERP

written by Lauri Moon | October 19, 2021

Systems of Intelligence based on robotics, artificial intelligence, and machine learning cannot be implemented on a weak foundation. They depend on solid Systems of Record, such as Accounting/ERP, Warehouse Management, Procurement and Order Management. To keep up with the demands of their customers, many manufacturers are running home grown or legacy systems that need to be replaced.

- This workshop will provide attendees with a proven roadmap for success in selecting and implementing a new ERP system - the 5 Keys to Success which will help you Save Time, Save Money and Reduce Risk.
- You will learn proven, successful strategies that you can utilize in your ERP selection process.
- We'll cover what due diligence really means. It's a lot more than legal contract review!

Target Audience: C-Suite, VP Operations, those responsible for the current systems.

Presenter:

Sandy Vosk

Founder & CEO

About Sandy Vosk

Sandy Vosk is the President of Advantage Technology Solutions, Inc. Sandy began his career on the corporate side at PepsiCo, TNT Express Worldwide, Philips

Electronics and Mutual of New York (MONY), where he consistently led major, strategic digital transformation projects with consistent success.

Sandy is a highly-sought speaker, panelist, and contributor at industry conferences and is very committed to “giving back” to the industry and the community. He is President of the NY/NJ Roundtable of the Council of Supply Chain Management Professionals (CSCMP) and serves on the Board of the Urban Assembly School for Global Commerce (UASGC), helping HS students find opportunities for economic advancement through access to college and careers in the supply chain industry.

About Advantage Technology Solutions

ATS helps manufacturing companies ensure investments in technology improve profitability, operational efficiency & the ability to satisfy customer demands. Sandy founded ATS in 2003 to help companies find innovative strategic solutions to their supply chain technology challenges.

Many clients hire Sandy for advice in keeping up with the demands of eCommerce and modernizing their operations while others want the ATS team to support their selection and implementation of a new Warehouse Management System (WMS) and/or an Enterprise Resource Planning system (ERP).
