

Energy Industry Overview Map - Natural Gas: Carbon Capture

written by Lauri Moon | May 27, 2025

**ENERGY &
MANUFACTURING®**
— in Appalachia —

The Energy & Manufacturing in Appalachia (EMA) project helps manufactures understand and navigate opportunities in the vast energy supply chains.

The EMA team, along with outside experts, have developed supply chain maps for each energy segment or sub-segment to help manufacturers navigate these industry sectors. The supply chain maps provide introductory overview of the market size, key drivers, supply chain needs, and components for each of the specific segments. Additional resources are provided to learn more about the industry and keep up to date on the latest advancements, opportunities, and potential funding opportunities as well.

This Natural Gas: Carbon Capture energy overview was drafted by Dr. Katherine Hornbostel, who gathered content and information from a variety of sources referenced within the document. Dr. Hornbostel serves as the department chair and an associate professor in the Mechanical Engineering department at Duquesne University.
