

Energy Industry Overview Map - Nuclear Industry Overview

written by Lauri Moon | May 27, 2025

The Energy & Manufacturing in Appalachia (EMA) project helps manufactures understand and navigate opportunities in the vast energy supply chains.

The EMA team, along with outside experts, have developed supply chain maps for each energy segment or sub-segment to help manufacturers navigate these industry sectors. The supply chain maps provide introductory overview of the market size, key drivers, supply chain needs, and components for each of the specific segments. Additional resources are provided to learn more about the industry and keep up to date on the latest advancements, opportunities, and potential funding opportunities as well.

The Nuclear Industry Overview was drafted by the Penn State Extension Energy Team, which gathered content and information from a variety of sources referenced within the document. The Penn State Extension Energy Team is committed to providing science-based, general education on numerous energy-related topics. To contact the team or for more information, go to www.extension.psu.edu/energy.
