Optimizing Inventory Levels in the New Now

written by Lauri Moon | August 10, 2020

The turmoil created by 2020 has been unprecedented for manufacturers. Even in normal times, right sizing inventory and managing your manufacturing operations and a complex distribution supply chain are some of the most challenging parts of an enterprise. Adding in the multiple unexpected changes that the last 6 months have presented, and the survival of your business hangs in the balance.

Disruptive events and technology are creating the new now, but you can not only survive, but thrive in this time of unprecedented change.

Join us to examine how your company can get a handle on these challenges through an integrated ERP solution.

Learn how to respond to the common (and right now uncommon) inventory management and supply chain challenges facing manufacturers and distributors today, including:

- How to assess your current manufacturing and supply chain processes
- How to leverage modern ERP solutions like NetSuite to optimize inventory levels
- How to gain control and achieve real-time visibility over operations

Plus industry experts from Ultra and Terillium will be there to help you with your enterprise issues, so bring your questions and problems!
