

Organizing Your Shop Floor to Increase the Productivity of Your Most Valuable Assets: You and Your Employees

written by Lauri Moon | May 30, 2019

As a small machine shop or fabricator, you have a limited number of people and resources. So why waste your time searching for tools and material. Instead learn to recognize these time wasting activities and techniques to eliminate this waste so you and your team members can devote more time to value-added work.

By attending this webinar you will be able to:

- Recognize non-value added activity and its effects on your capacity
- Better organize your shop, reducing frustration caused by having to repeatedly seek and find items
- Increase the output of your most valuable resources
- Make significant, impactful improvements at little to no cost

IMC's sister-center, the Georgia Manufacturing Extension Partnership (GaMEP) was recently awarded a grant to assess machine shops. One of the top needs that came out of the more than 50 assessments over the past year was the shortage of skilled employees. This webinar will help answer how can my employees and I work more effectively and provide valuable tips and tools to get you started.
