

# Powdered Metals - Industry Trends and University Engagement Opportunities

written by Lauri Moon | November 8, 2021

With increased global competitiveness and challenging customer demands, companies in the powdered metals industry must continue to explore different avenues of innovation in order to maintain and grow their businesses. This webinar will focus on how Penn State can assist companies in tackling challenging problems facing powdered metals companies today.

In this webinar, PennTAP will be joined by Dr. Todd Palmer, Professor of Engineering Science & Mechanics and Materials Science & Engineering and director of the Center for Innovative Sintered Products, and Dr. Daudi Waryoba, Associate Professor of Engineering from Penn State Dubois.

Dr. Palmer and Dr. Waryoba will present current research activities at Penn State as well as look at the future trends related to the powdered metals industry. They will also discuss the facilities at Penn State which can support industry needs and share ways to engage with faculty and student expertise to solve challenging problems facing powdered metal companies today.
