Protecting Your Business From Cybersecurity Threats During COVID-19

written by Lauri Moon | November 24, 2020

With more employees working from home, manufacturers must revisit their cybersecurity protocols to protect against new cyber-threats that have emerged in response to changes in how we work.

Additionally, cybersecurity is increasingly enforced in contracts and regulations, such as the Cybersecurity Maturity Model Certification (CMMC). Manufacturers and contractors should prepare accordingly.

In this webinar, MEP National Network cybersecurity expert Michael Kelleher will offer practical suggestions to combat emerging cyber-threats and secure your business going forward.

Primary Topics:

- The latest cybersecurity threats since the COVID-19 crisis began
- How you can respond to emerging cyber-threats
- Tips to prepare for emerging requirements such as CMMC
