

SMB Cybersecurity Webinar: Introducing New CISA Program to Prevent Cyber Attacks

written by Lauri Moon | September 10, 2021

Recent reports have found that SMBs are just as likely to be targeted by hackers as their larger counterparts. Simply, no organization is too small to be a victim of a cyber attack.

This year, CISA (Cybersecurity & Infrastructure Security Agency) introduced a new program called Cyber Essentials that focuses on what SMBs can do to improve and strengthen their cyber readiness and resilience.

Join Bradford Willke, Senior Advisor at CISA, and Stuart Cohen, President of IGI CyberLabs, as they discuss:

- Why CISA created the Cyber Essentials program
- How SMBs can improve their resilience against cyber attacks
- What SMBs need to look for when managing cyber risk
