

Strengthen and Diversify your MFG Talent Pipeline with Apprenticeships

written by Lauri Moon | June 16, 2021

With today's skilled worker shortage, learn how an well-developed apprenticeship program allows you to grow your own talented workforce.

Join IMEC and JFF's Center for Apprenticeship & Work-Based Learning to learn how the tried-and-true apprenticeship training model can be used to attract and develop talent and create a more diverse manufacturing workforce.

Promising practices and strategies will be shared on the components, partnerships, and equitable and inclusive practices that make these programs beneficial for both the employer and apprentice.

Apprenticeship has proved to be an effective means of training and upskilling new hires and incumbent workers in a wide variety of manufacturing occupations, such as machinist, CNC machine operator, manufacturing engineering technician, and many other high-demand roles, so come to this webinar and discover how it can work for your company.[web](#)
