Supercharging Your Safety Program with Hazards & Observations Mobile Technology

written by Lauri Moon | February 14, 2019

This webinar will teach listeners how to turn frontline employees into safety superheroes through mobile applications. The potential of technology will be linked to the reality of EHS managers and frontline staff, including tips on how to evaluate software solutions.

By watching this webinar, you will learn:

- Best practices when implementing a hazard identification program
- How mobile technology can enhance your hazard identification program
- Reality vs. Hype: How technology engages frontline workers
- Top things to consider when evaluating mobile technologies

Speaker:

Amy McNaughton, EHS Professional, Intelex

Amy McNaughton started as a consultant and EHS professional in operational and exploration mining and is now employed at Intelex – a leading EHS software provider. Amy has spent over 10 years on the front line of health and safety in everything for underground mines, oil and gas facilities, manufacturing plants and retail facilities. Her focus has always been around safety culture and building behavior focused training and open communication environments. Amy has worked on 3 continents, lived in the most remote parts of the world and has been responsible for the safety and culture of the projects she manages.
