<p>What to Expect from Trump's OSHA in the New Year</p> <p>The Trump Administration has taken the reins at OSHA, and the first year of the new OSHA's enforcement and regulatory (or de-regulatory) agenda is in the books. We have already seen significant changes in the way OSHA does business and the tools available to the Agency in its toolkit. Now, as the Trump Administration finishes filling out the OSHA leadership team with its own appointees, we are sure to see more shifting of enforcement priorities, budgets and policies, and an amplified effort to repeal or re-interpret controversial Obama Era OSHA rules and policies. This presentation will forecast for employers the changes and developments at OSHA employers can expect during this period of flux.</p>

2018 is anticipated to be a big year for change. Future success will be achieved by adopting an enhanced mindset focused on anticipation, preparation, and action in regards to delivering excellence to both internal and external customers. The future of our EHS profession is in the capable hands of those who understand that we must evolve to the point of transformation at a rate slightly higher than the speed of business and of those who embrace a relentless drive to exceed mission requirements.
