Webinar: ISO 50001:2018 Update

written by Lauri Moon | March 22, 2018

The ISO 50001 standard specifies the requirements for establishing, implementing, maintaining and improving an energy management system. The purpose is to enable an organization to follow a systematic approach in achieving continual improvement of energy performance, including energy efficiency, energy security, energy use and consumption.

By attending this webinar you will be able to:

- Identify the changes in 50001:2018 and how they impact your company
- Determine the steps to take to transition, have an action plan
- Understand the standard timeframe to get ready.
