

Webinar: Leverage Your 3D CAD Models to Produce Better, Faster Quotes

written by Lauri Moon | September 17, 2018

Accelerate Custom Product Sales with Design Automation

The first to respond to an RFP is often the company that ultimately wins the business. The challenge is not just in turning around the proposal quickly, however—it's also making sure that it's quoted accurately so the business you win is profitable as well.

Accuracy and speed are both difficult to come by when trying to precisely match your customer's requirements to the complex systems you deliver.

Join this webinar to learn how your teams can

- Eliminate much of the manual engineering effort that goes into responding to bids
- Easily define rules based on existing 3D CAD models to create a product configurator for internal engineering/sales teams
- Deploy an online configurator that can be accessed by your customers
