## IMC Secures ARC Grant to Advance Green Energy Manufacturing and Workforce Development in Central PA

written by Lauri Moon | November 26, 2024

The Innovative Manufacturers Center (IMC), a public-private partnership dedicated to supporting small- and medium-sized manufacturers (SMMs) in Central Pennsylvania, has been awarded a \$510,000 grant from the Appalachian Regional Commission's (ARC) Appalachian Regional Initiative for Stronger Economies (ARISE) fund.

This funding will enable IMC to help SMMs in its 12-county region expand or enter the growing green technology and clean energy sectors, fostering economic growth and sustainability.

## **Driving Green Technology Adoption**

The ARC grant will support Central PA manufacturers in adopting technologies and practices for renewable energy, hydrogen power, low-carbon and decarbonized energy, smart grid improvements, electric vehicles, and green buildings.

## IMC will provide:

- **Training and Technical Assistance**: Resources to upskill employees and implement green technologies.
- **Supply Chain Mapping**: Insights to help manufacturers identify and capitalize on opportunities in the green energy market.
- Factory Upgrades Guidance: Support for facility improvements to meet the needs of clean energy production.

## **Empowering Regional Growth**

This initiative will strengthen Central Pennsylvania's manufacturing ecosystem, positioning the region as a leader in green energy innovation while creating jobs and enhancing sustainability.

Central PA manufacturers interested in leveraging this opportunity are encouraged to contact IMC for more information at info@imcpa.com, 570-329-3200.
