## National Strategy for Advanced Manufacturing

written by Lauri Moon | January 11, 2023
The National Strategy for Advanced
Manufacturing released by the White House in
October 2022 presents a vision for U.S.
leadership in advanced manufacturing that will
grow the economy, create jobs, enhance
environmental sustainability, address climate
change, strengthen supply chains, ensure
national security and improve health care. Three
interrelated goals are set to achieve the vision:

- 1. Develop and implement advanced manufacturing technologies
- 2. Grow the advanced manufacturing workforce
- 3. Build resilience into manufacturing supply chains and ecosystems

To achieve these goals, 11 strategic objectives and 37 technical and program recommendations are identified for the next four years. This Congressionally mandated strategy seeks to improve U.S. government coordination and provide long-term guidance for federal programs and activities in support of U.S. manufacturing competitiveness, including advanced manufacturing R&D.
