PennTAP Advanced IT Teams with the Applied Research Laboratory

written by admin | March 29, 2016

PennTAP Advanced IT has recently shared a report by the Applied Research Laboratory at Penn State, titled *Understanding Security.* This study encourages immediate action to secure critical information at small to medium businesses (SMBs). The realities of escalating informational threats to SMBs are shown through examples and details of attacks. A list of 100 things under $100 explains how to mitigate risks and vulnerabilities.
