

IMC Business Advisor, Rick Terry, Earns Smart Manufacturing Acceleration Roadmap Professional Certification

written by Lauri Moon | September 17, 2025

The Innovative Manufacturers Center (IMC) is proud to announce that Frederick (Rick) Terry, Business Advisor, has successfully earned the CESMII Smart Manufacturing Acceleration Roadmap Professional Certification from Rensselaer at Work, a division of Rensselaer Polytechnic Institute.

The CESMII developed certification recognizes professionals who demonstrate advanced knowledge and practical skills in designing and implementing customizable strategies that accelerate digital transformation within manufacturing operations. Through the program, participants learn to align emerging technologies with business objectives, streamline production processes, and drive innovation across manufacturing systems.

“Rick’s achievement reflects not only a personal commitment to professional growth, but also IMC’s dedication to advancing modern manufacturing practices,” said

Dennis Gilbert, President at IMC. “This expertise will further strengthen IMC’s ability to deliver smarter, more efficient, and more resilient solutions for our partners and clients.”

Rensselaer at Work is recognized for its focus on equipping professionals with future-ready skills in engineering, science, and technology management. The Smart Manufacturing Acceleration Roadmap Certification is designed for leaders who are driving transformation in an increasingly data-driven and competitive industry.

Terry will apply this certification to enhance IMC’s initiatives in process optimization, data integration, automation strategies, and digital innovation, helping position the organization and our manufacturing clients at the forefront of smart manufacturing.

Contact Rick Terry at rickt@imcpa.com or (570) 329-3200 and discover how this certification can help your company accelerate your digital transformation!
