

State Launches Manufacturing Call to Action Portal

written by Lauri Moon | April 6, 2020

With the on-going need for PPE and other critical medical supplies, the Wolf administration has launched a Manufacturing Call to Action portal, with the intent to:

- **Match** Pennsylvania manufacturers and distributors to fill specific supply chain needs to meet increasing demands for medical supplies and related products.
- **Assist** Pennsylvania manufacturers who have workforce needs or gaps and assist them with identifying skilled workers.
- **Identify** Pennsylvania manufacturers who can pivot or innovate to fulfill the demand for medical supplies and related products.

The administration welcomes manufacturers as described above with a Pennsylvania presence to inform the state of capabilities, needs, gaps or potential innovative solutions. To submit information, visit <https://spportal.dot.pa.gov/ppeinventory/pages/mschain.aspx>.
