

Survey on the Value of Manufacturing Credentials

written by Lauri Moon | June 19, 2017

The National Institute of Standards and Technology (NIST), through the Hollings Manufacturing Extension Partnership (MEP) is conducting a study to determine the use and value of manufacturing credentials.

There are many choices of credentials, but a significant lack of independent research regarding the quality, market value and effectiveness of manufacturing specific credentials. This research will provide information to U.S. manufacturers, career counselors and job seekers in reducing training costs and narrowing the skills gap.

On behalf of NIST MEP and IMC, we are asking you to participate in this important initiative. Please use the link below to access the survey before June 30th. Thank you for your time.
