

# Mission Critical - Safely Starting Back Up

written by Lauri Moon | May 26, 2020

COVID-19 has not just caused a temporary interruption to our everyday lives, it has ushered in a new reality. The basic principles of safety will not change, but the strategies and tactics must. All change impacts safety, and leaders need to address these changes with strategic planning and proactive practices. Poor safety performance is an indicator of inadequate strategic planning.

Organizations that remain committed to the pursuit of safety excellence have been proactively examining the best case, worst case, and most likely scenarios. They are working to outline actions under these three scenarios as they plan for the new normal and the reopening of the global economy. Learn how to remain committed to safety excellence during confusing times and how to maintain the focus on and in safety. While there is always risk of doing the wrong thing, there is a greater danger in doing nothing. It is time to begin strategically planning for the new reality.

Are you ready to take control and secure your safety future?

# New Challenges for Employers as They Return to Work After COVID-19

written by Lauri Moon | May 26, 2020

Once President Trump announced the “Opening Up America Again” guidance on April 16, which provides discretion to state governors and local officials to make individual determinations about relaxing return-to-work and non-essential business closure orders, states immediately began to announce their plans for reopening businesses. Businesses will soon reopen, presenting employers with new challenges as part of the next phase of the COVID-19 pandemic. Business guidance and legal requirements are changing rapidly. This webinar will discuss changes implemented that employers must be ready for as states reopen for business. This webinar session will cover:

- How to prepare for taking temperatures and making spatial changes in the workplace
- Handling employees that refuse to work
- Managing your suppliers to ensure they’re adhering to your EHS requirements
- Assessing the workplace for PPE, including face coverings
- What potential legal claims employers could face, including OSHA claims

# The Pulse of Performance Management 2020 - The Transformation of Finance

written by Lauri Moon | May 26, 2020

What is the impact of the current economic volatility on FP&A groups? What role can performance management play in providing the tools to successfully help companies manage through this period? Are today's conditions accelerating the initiation of Finance Transformation / Modernization projects?

As more companies move forward with performance management, they need to understand their options. Which vendors received the highest ratings from their customers for budgeting, consolidation, reporting, dashboards, and analytics? How do vendors differentiate themselves?

Now in its 17th year, this annual web event will quickly get you and your team up to speed on the latest in budgeting, planning, forecasting, consolidation, reporting, and analytics. This information will enable you to confidently embark on a new performance management project, or identify opportunities to enhance an existing one.

**Note: this is a cross-industry webcast.**

The following information, all new or updated for 2020, will be covered:

- New for 2020: Vendor strengths to help you identify which vendors line up with your key selection criteria
- New for 2020: Focus on key elements of AI/ML adding value to performance management solutions today
- New for 2020: Core vendor functionality heatmap highlighting highest rated vendors in each area

- Updated analysis of the relationship between forecast accuracy and forecasting methodology
- The key vendors to consider for your performance management project will be identified and reviewed based on their core, specialized, and advanced functionality, latest enhancements, market success, and customer satisfaction with a focus on ease of use

BPM Partners will reveal for the first time anywhere:

- BPM Partners' core list of performance management vendors for 2020 - successful, mainstream solutions with broad appeal
- The BPM Pulse 2020 vendor customer satisfaction ratings
- The 3rd Annual BPM Pulse Awards for Top Rated Vendors

# **Strategies for Success in Manufacturing Software Implementation**

written by Lauri Moon | May 26, 2020

Over half (50 - 70%) of ERP projects fail. Despite the high costs incurred in failure,

and the prominence of these projects, the success rate has not improved. Why?

Surveys and anecdotal reports consistently cite time, budgets, and lack of senior management involvement, but those are external factors to the direct implementation processes which should be followed and are normally the result of insufficient information prior to commencing with the project.

What elements of the project are under your immediate control and set the stage to eliminate these common failure reasons?

There are standard, widely accepted processes required for a software implementation project, including planning, documenting, training and testing. One critical task which is commonly not done or done poorly is a formal Business Process Review (BPR). Without a solid BPR, project requirements are not formally defined nor prioritized, so the potential software features and design - which may not be related directly to your business goals — become the de facto requirements. Although the review may be done as part of the implementation project, ultimately the BPR should be performed prior to selecting software, so there is a basis and justification for the decision.

Join John Hoyt and Jane Scanlan, co-founders of the Next Level Manufacturing Consulting Group to learn about the key elements of a great BPR that, when done correctly, will contribute to a higher probability of success for your project. These elements include:

- Documenting standard business process functions and controls
- Interviewing key management and staff
- Reviewing existing system features and related procedures
- Gathering current forms and reports
- Developing process improvement recommendations
- Defining priorities

# **Functional Safety of Control Systems**

written by Lauri Moon | May 26, 2020

The objective of the webinar is to define the processes and standards that are important in the design and evaluation of safety-relevant control systems. This webinar addresses how ISO 13849-1/2 and ANSI B11.26 (standards for safety-relevant control systems) is applied in automation and in the design of plants.

- Be aware of the relevant standards related to safety control systems
- Overview of the necessary process from assessment to validation when designing or modifying safety related control systems
- Overview of the key factors and parameters related to safety control system design and the related design implications

# Top CPG Manufacturers Reveal Strategies for Success

written by Lauri Moon | May 26, 2020

The consumer packaged goods (CPG) industry is in flux. Manufacturers face a wave of ever-shifting demand and the need for ever-shorter lead times, plus an unprecedented array of new disruptive technologies to evaluate and implement. Successfully navigating these complex challenges can mean pulling ahead of the industry; failure can mean losing out to nimble competitors. **But how can you chart a path to not only survive, but succeed, in an environment of change?**

IndustryWeek partnered with Oracle to survey leading CPG manufacturers to find out.

In this webinar, we will reveal the research findings and show what strategies, tactics, and technologies top manufacturers are using today to drive their competitive edge. **We will also share practical steps you can take to pull ahead of your competitors.**

Join us to find out more about burning topics such as:

- What emerging technologies matter most to leading CPG manufacturers
- How mixed-mode manufacturing can increase flexibility and efficiency
- The top ten best practices shared by top CPG manufacturers
- How the cloud has become an essential tool for digital transformation
- Next steps to drive your company into the future

# **How a Crisis Reveals the Weakest Link in Your Supply Chain: Tips to Prepare and Adapt**

written by Lauri Moon | May 26, 2020

When a crisis hits, whether it's a global event (like a pandemic, war, or raw material shortage) or vendor-specific (like a fire, flood, or even a family emergency), a disruption to your supply chain can be catastrophic to your business. The better prepared you are, and the better you understand your supply chain, the better you can weather the storm. From minimizing risk (especially with offshore suppliers) to having backups already in place, we'll discuss ways to identify the weak links in your supply chain and provide insights to help overcome them.

**Join us for this webinar sponsored by our sister center FuzeHub and learn:**

- How COVID-19 has impacted supply chains across the globe
- What you can do now if your supply chain is being disrupted by COVID-19
- How to perform risk assessment and quality audits on new potential suppliers
- Creative strategies to help finance your project and procure components when investment options are limited

- The costs and tradeoffs of domestic versus international manufacturing

# Smart Manufacturing Systems: Improving Processes and Ensuring Product Quality

written by Lauri Moon | May 26, 2020

In the expanding world of Industry 4.0, manufacturers are under greater pressure than ever to be flexible and efficient. By leveraging the vast amounts of data generated by IoT, AI, and other technologies, today's smart measuring systems can provide many of the key capabilities smart factories need to improve process efficiencies and ensure product quality.

In this webinar, you'll hear from experts about how these innovative systems use measurement and instrument functionality data to improve production rates, enhance accuracy and quality, increase measurement insights and provide critical, real-time information about the condition and status of production machines.

You'll learn how smart measuring systems can help you:

- Enable remote monitoring of measurement machines and parts
- Get a complete view of the quality process and enable 24/7 measurement
- Reduce downtime and unexpected issues
- Gain data management visibility into all connected instruments
- Achieve long-term preventive/predictive maintenance and use statistics
- Achieve your vision of the future of quality measurement at the Smart Factory

## **Speakers**

### **Hany Abdel-Motaleb, MeasurLink & Data Management Specialist, Mitutoyo America Corporation**

Hany Abdel-Motaleb is Mitutoyo's MeasurLink & Data Management Specialist. Hany has Bachelor's degrees from Northern Illinois University in Communications and Industrial Management & Technology with an emphasis in Computer-Integrated Manufacturing. Hany assists customers in sales, support, training, and consultation with all things related to data collection, data management, and Statistical Process Control.

### **Gene Hancz, Coordinate Measuring Machine Product Specialist, Mitutoyo America Corporation**

Gene Hancz is a Coordinate Measuring Machine Product Specialist with Mitutoyo America Corporation. Gene has more than 35 years of experience in the dimensional metrology field. He has an extensive background in coordinate measuring and has stayed closely tied to evolving CMM technology and market trends throughout his career.

# Preparing for the Post-COVID-19 Pandemic Maintenance Operations “Thaw”

written by Lauri Moon | May 26, 2020

While none of us are sure of when the end of the pandemic will be, we realize our manufacturing operations are in a time of transition. We've gone from the preparation phase to the reaction phase and now we're planning for what the future looks like. Whether your maintenance operations have slowed and you're now ramping back up to normal or you're recovering from adjusting to a more hectic schedule to deliver critical products, it is an inflection point time in your business where decisions made in the next few months will determine your future.

Join our webinar to help tackling questions like:

- What have you learned from operating during COVID-19?
- What do your short-, mid- and long-term plans in the aftermath look like?
- What can you do to set yourself up for a successful transition to the “new normal”?

We'll share tools you can implement now and in the future to:

- Report and analyze your work (like COVID-19 tasks and deferred maintenance you may have addressed)
- Focus in on operational improvements you can make immediately (like digital documentation, maximizing staff efficiency, optimizing workflow, becoming more lean, improving parts and procurement, etc.)
- Invest in technology to help with mobile/remote work and communication

**Speaker**

## **Paul Lachance, Senior Manufacturing Advisor, Dude Solutions**

Paul Lachance has spent his entire career devoted to optimizing maintenance teams by enabling data-driven decisions and actionable insights. He wrote his first CMMS system in 2004 and has since spent his professional career designing and directing CMMS and EAM systems. A regular speaker at national tradeshow, he's been featured at IMTS, Fabtech and SMRP as well as several industry magazines. He currently serves as the Senior Manufacturing Advisor for Dude Solutions.

# **Funding for Energy Efficiency**

# Equipment Upgrades

written by Lauri Moon | May 26, 2020

Taking advantage of opportunities to improve efficiency and reduce energy-related costs often requires investment in new equipment, technology, or controls. Identifying funding available to your business and providing estimates of project payback are key components to reaching your goals.

Often, many companies are eligible to apply for funding to assist with improvement efforts. Eligibility of sites and projects, however, should be considered carefully.

This PennTAP webinar will discuss funding opportunities for energy efficiency equipment upgrades for small to mid-sized companies throughout Pennsylvania.
