

Webinar: The Connected Worker - Modernize Safety Risk Management

written by Lauri Moon | June 7, 2018

Digital Transformation has had a profound impact on how businesses operate, the way people work, and the trend continues to accelerate. The potential for digital innovation to improve safety and operational performance is great. Technologies such as sensor-equipped wearables, digital beacons, and augmented reality provide real-time interaction for workers with the work environment and safety/risk management system processes and procedures. But merely applying technology is not inherently useful. The real value is the interaction of technology with the total organizational system and the people and processes comprising it.

During this webcast, LNS Research will explain how safety and operations leaders can use digital innovations to enable the connected worker, improve safety, and mitigate risk.

What you will learn:

- Impact of Digital Transformation on the workplace, and why it's an opportunity for safety and health leaders
- How to engage the workforce to reduce risk using the EHS 4.0 framework
- What are the technology enablers that leading companies use today
- Real-world connected worker use cases to improve safety
- Recommendations to facilitate low risk, high-value digital innovation projects

Who should attend:

- VP/director of EHS
- Safety and health leaders
- Compliance leaders
- Risk leaders
- Operations leaders

Speakers

✘ Peter Bussey, Research Analyst, LNS Research

Peter Bussey is a Research Analyst with LNS Research; he primarily focuses on environment, health, and safety (EHS), and sustainability in the industrial sector. Mr. Bussey has more than 30 years of experience in manufacturing, consulting, and technology to support EHS management, R&D, asset management, risk management, product lifecycle management (PLM), enterprise asset management (EAM), and supply chain. He has held key positions at global companies such as SAP, Alcoa, Michael Baker Corporation, Arthur D. Little and Oracle. Mr. Bussey earned a Master of Science in Environmental Health from Harvard University, a Master of Public Management with distinction from Carnegie Mellon University and a BS in natural sciences with departmental honors from Johns Hopkins University.

✘ Donovan Hornsby, Vice President & Corporate Strategy Executive, Gensuite LLC

Donavan Hornsby is Vice President & Corporate Strategy Executive at Gensuite LLC, software-as-a-service (SaaS) provider of Gensuite®, the award-winning suite of cloud-based software solutions enabling compliance and management systems excellence across EHS, Quality, Sustainability, Security, Responsible Sourcing, and Product Compliance. Donovan leads Gensuite's Business Development and Strategy organization, including market development and product innovation strategies. Prior to joining Gensuite in 2001, Donovan held various leadership roles within the technology and service sectors. Donovan received his MBA with distinction from the University of Louisville and his undergraduate degree from DePauw University. Outside of his professional commitments, Donovan leads a non-profit organization, working with landowners to protect and conserve land with special natural, agricultural or scenic value in northern Kentucky and surrounding regions.
